Based on the provided data on student placement, here's a concise summary of the central tendency measures:

Mean: The average performance across all students is around 67.3% in 10th grade, 66.3% in 12th grade, 66.4% in undergraduate degree, 72.1% in the entrance test, and 62.3% in MBA. The average annual salary is approximately 288,655.

Median: The median performance indicates that half of the students scored below or equal to 67% in 10th grade, 65% in 12th grade, 66% in undergraduate degree, 71% in the entrance test, and 62% in MBA. The median annual salary is 265,000.

Mode: The most frequently occurring values in the dataset are 62% for 10th grade, 63% for 12th grade, 65% for undergraduate degree, 60% for the entrance test, and 56.7% for MBA. The mode of the annual salary is 300,000.

These measures provide insights into the central tendencies of academic performance and salary distribution among the students in the dataset.
